

## Statement of Conflict Minerals

ORing and its suppliers shall take social and environmental protection responsibilities.

The "Three No" principle for ORing is no support, no acceptance and no use of metals, such as gold (Au), tin (Sn), tantalum (Ta) and tungsten (W) from the Democratic Republic of the Congo and its neighboring nations as well as armed conflict areas where metals are mined illegally from unacceptable working environments. We promise that we will continue to pay attention to the issue.

Implement the green supply chain to comply with customer's requirements and international justice practice. Understand the management condition of the conflict minerals by suppliers and investigate for the RMI Conflict Minerals Reporting Template.
